Extract from Northern Ireland Teaching Competences related to Inclusive teaching

Requires a values-based approach to teaching

Sockett (1993) suggests that:

‘It is...impossible to talk extensively about teachers and teaching without a language of morality.’

Dalmau and Gudjonsdottir (2002) sought to identify the diverse roles that professional educators embrace depending on their circumstances and opportunities. These include acting as:

*pedagogues and experts in teaching and learning:* activist teachers share their knowledge and understandings in an ongoing professional dialogue;

*reflexive and critical problem solvers:* teachers continuously monitor pupil progress and learning within the classroom; outside that environment they reflect both as individuals and as communities of practice on their practice and pupil progress;

*researchers and change agents:* in seeking a deeper understanding of their practice, or in seeking to plan for change, teachers use a variety of evaluation and action research techniques to collect and interpret findings, to inform their thinking and decision making; and

*creators of knowledge and theory builders:* in the process of reflexive practice and action research teachers develop new understandings of learning, teaching and educational change. The above resonates with the Council’s concept of the reflexive and activist practitioner who, individually and collectively, will reflect on the nature and purposes of education, and will seek to act as both a shaper of policy and a well informed critic of proposals and reforms.
