(2011) Les aides informatiques utilisées dans le cadre des études scolaires ou post-bac par les déficients visuels : éléments de réflexion [Computer tools used in schools or after graduation from secondary school by visually deficient persons: elements for discussion]. Nouvelle revue de l'adaptation et de la scolarisation, 55

Abstract

In the framework of the activity of the Observatory of Adapted Digital Resources, a survey was carried out of about 100 pupils with visual impairment in order to show the computer tools used and the practices, as well as the pupils' opinions about these technological tools' contribution and characteristics in the framework of education. This questionnaire also included a blank area where the pupils with visual impairment could add any useful comments about the tools used in their education. This article summarises data collected during the survey conducted from May to June 2011.
