

Gaudé, N (2010) La téléprésence en classe, une réponse aux absences scolaires pour raison de santé? [Is the use of television in classroom teaching an answer to absence of pupils for health reasons?] Nouvelle revue de l'adaptation et de la scolarisation, 51

Abstract

Using the example of a project in a special school for pupils with serious medical problems (Centre Médical et Pédagogique in Varennes-Jarcy), this article shows how distance learning, combined with an interactive whiteboard, can enable pupils in a vocational secondary school who are absent for health reasons to attend classes virtually. The article analyses the relevance of this method, its advantages, conditions and limits. As a complement to this article, the video illustrating this project is visible on the website of the Agency for the Use of ICT in Education (Scérén-CNDP).
