Kommentar:

- I´t was very interesting to hear how they work in other countries. An experience that I woldn´t have experienced otherwise so this I definetly hope you will continue to do.
- -
- I am sorry but no anwer from me because we in my group didnt had any english guest
- It was nice and an instructive day!
- We didn't have any guest in our literature seminar so we spoke Swedish. It would have been good if the literature was in English and if all groups had a guest.
- I think it was a great experience to get the oppertunity to discuss with the european guests. It was good to get an international connection through discussion rather than just reading about it. If there is any possibility we should have these kind of seminars more often.
- I think that the guests learned more about how we work in Sweden, than we got the chance to get to know how they work in their country, due to the task that was given. Since there was a language barrier between us and our guest, it takes more time to talk, than it would have done if we all talked Swedish. Because of that reason it would be good if the meeting had been longer (more time).
- Personally I found the seminar in which our guests were included very interesting. It gave us an oppertunity to acquaint with how schools in their country deals with inclusion and pupils in need of special education. Our guests had very valuble ideas of how to work with inclusion and also they showed genuine interest in our edcation and the Swedish school environment.
- I did´t have a guest present during this seminare.
- We didn't get the chance to have a guest in our group, but the subject was interesting and the discussion in our group was good and also very interesting.
- very good! we had an interesting dicussion with our guest who was very open about her opinions and how they workt on her school.

- I think it was a fun and good experience and it was interesting to learn how they worked in an other country.
- It was a interesting time and I think we learned a lot.
- I think if the university tries to arrange such meetings for us with people and teachers from all other countries around the world it would be sure useful. It helps both sides to exchange their views and possibly adapt those new ideas and experiments in future. Thank you for that interesting course.
- I think it was very good that we had a discussion with another person who has knowledge of special education from another country. You got to realize how things can work in other countries, as well as the difference between that country and Sweden. It can be hard to have a fruitful discussion in a different language, but it is something you have to practice. The University of Borås (education/pedagogy-education) is in my opinion not working enough with the English language, and I think some of the papers in English should be submitted on a level of academical study.
- the seminarium was very interesting with our guest. It will be better if we had more time for the discussion.
- It was interesting to hear about their school system. I would've wanted to talk to more than one teacher though. I got an insight about schools in Belgium, which was very interesting. I wish that I could have talked to more teacher's from abroad. It would give one a better perspective on how we work in Sweden compared to the rest of Europe.
- It's was great to talk to someone who could explain how other countries work with similar "problems" and how we can act in the future.
- I thought it was interesting to talk to a professor from another country. We had the opportunity to question how they work in preschool and school. Think it's something you should continue as far as it goes.
- It was very interesting and a welcome break from the ordinary lessons.
- It was interesting but also a bit difficult to explain what you mean in English. But I hope our guest understand what we were talking about, and that it was a pleasant time for her. (sorry about the spelling)
- det var jätteroligt att höra hur olika skolorna är i andra delar av världen. vi hade en jättetrevlig man som gärna svarade på våra frågor. detta var något av det roligaste i kursen! =)
- Good
- It was awesome! It was a good experience to have to do it in English and also that these guests were good and understanding, what we thought about these "problems in school" and so on..
- It was interesting to hear how they work. They give also some information about how we can work and think in the future.
- It was interesting, and good practice in speaking English.
- Good books with good substances!
- I think it was very good to have a guest from an other country. They asked us things about our country and that make us think about how our society is and our school system. Things you don't think so much about in the everyday life. It was also very good that we could ask them questions about their country. It gives us a bigger understanding about other cultures.
- This was very nice! It would have been interesting to have some responses from the visitors about how they experienced our meeting as well. More personally than a general message to all students.
- GOOD!
- no
- ej haft i min studiegrupp.
- We didn't have an English guest in our group, but it did come a woman from Sweden who brought us very good information about the new Swedish school reform.
- -
- I thought it was good to be mixed into other people from other countries to discuss various things. We learned a lot and in a different way and fun way. It was interesting to hear their versions of various difficulties.
- I was in a group that didn't get any visitor:(. But it was good to read everybody's paper and give feedback to three of them. And it felt good to get feedback as well.
- To speak English with them. But I didn't do that because we didn't have any guest in our group...
- The sharing of experiences and knowledge was the most interesting part and could have been done without the literature and questions, that felt like a sidetrack. Or it could have been questions based on the special professional aims of our guests, different in each group.
- Very good and very useful, especially for me who will be an English teacher.
- We didn't get anyone to visit our group (gr. 4)
- It was a very good moment. I don't like English but I learned much for this seminar.
- I thought that it was both interesting and educational! It's always good to practice your English so I liked it.
- It was great!
- it was very good, and interesting, because there was new information we did not know about before. Really good, if possible, you should do it with the next group too.
- Interesting to hear what they think about our school system.
- We didn't get to meet any guests from abroad...
- It was interesting to hear about how they work in another country! We have a good discussion in my group and it was good training to speak English and listen to it. I would like to have more of this.
