

# Impact of VET SEN studies for the quality of life of VET SEN students based on the feedback from the students

# Introduction

- Objectives
  - to measure the impact of VET SEN studies and services to the quality of life of the VET SEN students with common questionnaire and common indicators.
  - to compare the results between
    - Luovi's units and sites
    - the EPR member organisations (includes also service providers with VR-clients)
    - VET SEN service-providers in Finland
- The methodology and questionnaire was originally developed about 5 years ago in Portugal by Centro de Reabilitação Profissional de Gaia (CRPG) and developed further during 2009-2010 by European Platform for Rehabilitation in (EPR) Outcome Measurement benchlearning group
  - The group has participants from Finland, France, Germany, Ireland and Norway and facilitators from Ireland and Netherlands
  - Participants from Finland are Marjut Huttunen and Riina Karvonen
  - The group continues 2011-2012

## Introduction

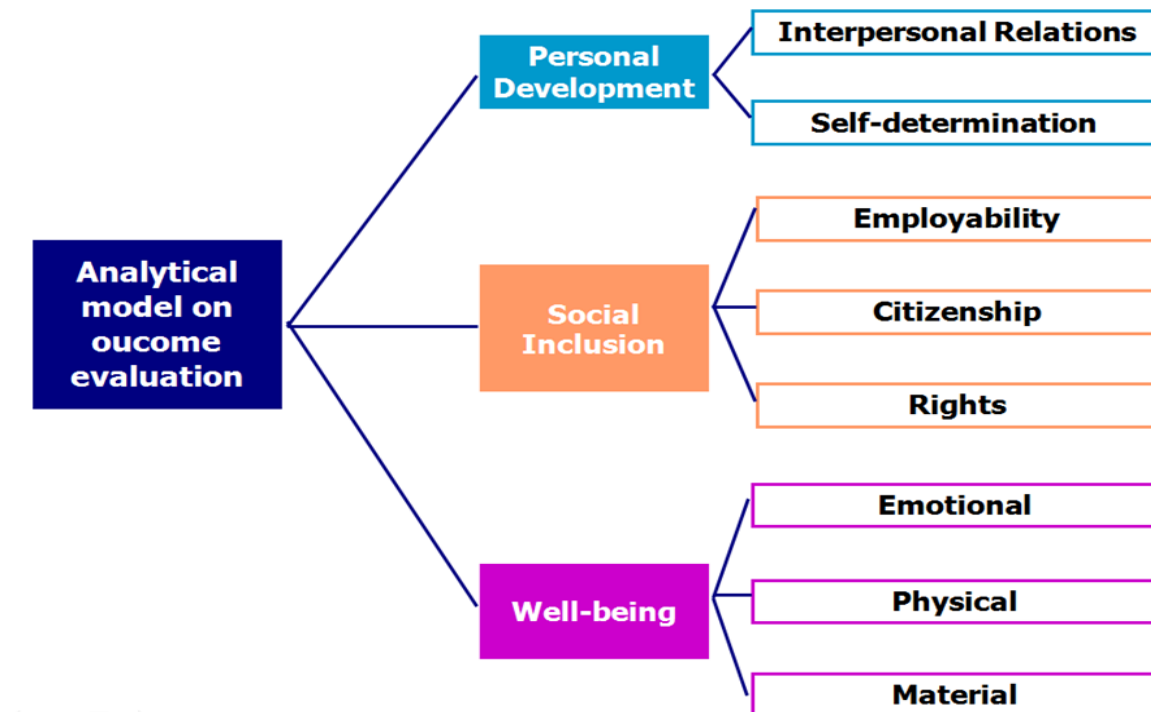

- EPR has given Luovi the permission to pilot the methodology and questionnaire between all VET SEN service providers in Finland in May 2011
- Luovi has already made one pilot at May 2010 as part of the Outcome Measurement work 2009-2010
  - These results has been discussed and compared between the group members

# Quality of Life Questionnaire

- The questionnaire takes place at the end of the VET SEN studies or VR-program
- The Questionnaire has 55 questions
  - Quality of Life – Questionnaire, version 1.10.2010
- The questions measure the performance and success of the service provider
- The questions produce the Quality of Life indicators
  - The methodology includes the definition and connection between the questions and indicators
- The aim in Finland is to use the indicator-portal of the Vocational Education Providers in Finland to comparison between VET SEN provides, maybe starting 2012

# Quality of life measurement

Operational diagram of the analytical model on outcome evaluation, based on the quality of life conceptual model

# Quality of Life measuring and profiles

- The VET SEN service provider can use the results also for assessing the results of individual students and as a data for Individual Study Plans
