## Our ambition

The core activities of the school are determined by four avenues of priority. These priorities all have a number of target areas. In our school we have selected two low-scoring target areas that we think will influence and partly determine several other areas. Through the input factors (the green bubbles) we will try to ensure the best learning environment possible. Focusing on assessment and the chief advisor concept we will strive to give each and every one of our students the best possible learning experience. We will annually evaluate the results achieved, and according to the principles of the learning organization consider minor or major adjustments to our methods/ concepts.
